

NEW MOON IN GEMINI · MONDAY, 15 JUNE 2026

Gemini

This ritual is about personal identity, confidence, and new beginnings.

A New Moon in your own sign is the rarest kind of permission — the sky itself is clearing a path.

PREPARATION

Face east. Open the space around you — move anything cluttered or stagnant, and if possible crack a window so something new can enter. Silence everything electronic and stand still for one breath before you begin. Pour a glass of cool sparkling water or bright citrus tea, hold it at eye level for a moment as if toasting someone you are about to become, and drink a clean, decisive sip. Close your eyes and picture yourself moving through the world as the most confident version of who you are right now — not a future self, but this self, fully arrived. See the way you walk, the way others turn toward you, the way you feel in your own skin. Open your eyes only when that image feels like a fact rather than a wish. The ritual begins now.

THE RITUAL

Light the **yellow candle** in one clean strike, and as the flame rises, say your own name aloud once — not as introduction, but as declaration of **your renewed presence in the world**.

Hold the **citrine** in both hands and roll it slowly between your palms, charging it with the specific quality you most want to lead with this lunar cycle, whether that is courage, clarity, or magnetic ease.

Crush a small pinch of dried **lavender** between your fingers so the scent releases, then breathe it in fully — letting it signal to your nervous system that **a new chapter is already open** under the light of *Gemini*.

Speak one sentence into the flame — a single, present-tense statement about who you are choosing to be this cycle — and feel the words land in the room like something real.

Set the **citrine** directly in front of the **yellow candle** and sprinkle the crushed **lavender** around it in a small circle, then sit quietly for five breaths, watching the flame as the ritual seals itself in light.
