

FULL MOON IN PISCES · FRIDAY, 28 AUGUST 2026

## Aquarius

*This ritual is for money, income, and material security.*

Security is not an abstract wish — it is a thing built, tended, and sometimes called in by those who have learned to take their own needs seriously.

### PREPARATION

Face north. Ground yourself before you do anything else — press your feet flat to the floor and feel the solidity beneath you. Clear the surface of anything unnecessary and let the room feel like a place where real decisions are made. Silence all devices and let the deep, steady music settle under your skin. Pour a glass of wine or warm tea, hold the cup firmly in both hands, and drink with the full attention of someone who knows that nourishment — in any form — is not guaranteed and should be received with awareness. Close your eyes and picture your material life as it is, then as you need it to be — not lavishly, but solidly, sustainably, with ground beneath your feet. Open your eyes only when the difference between those two pictures feels like something you are actually willing to work toward.

### THE RITUAL

Light the **blue candle** and face north with it, feeling the direction as one of accumulation and stability rather than retreat, knowing that **this ritual is about building real material ground** beneath your life.

Hold the **aquamarine** to the candlelight and name aloud, without rounding down or hedging, **the specific financial change or income source** you are calling in under this *Pisces* full moon.

Place a drop of **bergamot** oil on your fingertips and press them to the base of your throat and the center of your chest — these are the places where fear about money tends to live, and tonight you are replacing that fear with **a clear, grounded sense of sufficiency**.

Hold the **aquamarine** in both hands and sit in silence for two full minutes, breathing steadily, letting the low frequency of the music move through you like a reminder that steadiness is a practice, not a destination.

Set the **aquamarine** in front of the **blue candle**, press both palms flat to the surface, and extinguish the flame with one deliberate breath — the intention is grounded, the path is open, and now the practical work can begin.

### YOU WILL NEED

blue candle

aquamarine

bergamot

♪ deep forest sounds or steady low-frequency tones
