

NEW MOON IN SAGITTARIUS · TUESDAY, 18 NOVEMBER 2036

Scorpio

This ritual is for money, income, and building material security.

Money is not a mystery — it is energy with habits, and tonight you are the one who decides what habits it learns from you.

PREPARATION

Face north. Ground yourself before anything else — press your feet flat on the floor and feel the actual surface beneath you before you light a single thing. Clear the space around you of anything frivolous and set out only what is needed. Pour a glass of dark red wine or black tea and hold it in both hands, looking into the cup, before a slow and deliberate sip. Close your eyes and think not about wealth in the abstract but about the specific, real feeling of having enough — bills paid, a cushion, the physical ease of not calculating — hold that sensation in your body as if you already know it. Open your eyes when the feeling is solid. This is real work now.

THE RITUAL

Light the **black candle** and sit with the flame for a moment without rushing forward, acknowledging that this work — calling in real financial stability — is grounded and serious under this *New Moon in Sagittarius*.

Hold the **obsidian** in both hands and press it gently against your solar plexus, breathing into any fear or contraction you carry around money — let the stone absorb what the body has been holding without your permission.

Light the **myrrh** and breathe the smoke in slowly, letting its ancient, resinous gravity anchor you in the present moment, in the real body, in the actual life where **income and security are being built one clear decision at a time**.

With the **obsidian** still warm from your hands, set it before the **black candle** and speak aloud — without hedging — one concrete action you will take in the coming month to improve your financial position.

Let the **myrrh** smoke move through the space as the **black candle** burns, and sit in the quiet knowledge that **the intention has been set, the earth has heard it, and the work begins tomorrow morning**.

YOU WILL NEED

black candle

obsidian

myrrh

♪ deep forest sounds or steady low-frequency tones
